like other big city school systems chicago s has been repeatedly reformed over the last century yet its schools have fallen far short of citizens expectations and left a gap between the performances of white and minority students many blame the educational establishment for resisting change other critics argue that reform occurs too often still others claim it comes not often enough dorothy shipps reappraises the tumultuous history of educational progress in chicago revealing that the persistent lack of improvement is due not to the extent but rather the type of reform throughout the twentieth century managerial reorganizations initiated by the business community repeatedly altered the governance structure of schools as well as the relationships of teachers to children and parents but brought little improvement while other more promising reform models were either resisted or crowded out shipps chronicles how chicago s corporate actors led abetted or restrained nearly every attempt to transform the city s school system then asks whether schools might be better reformed by others to show why city schools have failed urban children so badly she traces chicago s reform history over four political eras revealing how corporate power was instrumental in designing and revamping the system her narrative encompasses the formative era of 1880 1930 when teachers unions moderated business plans previously unexplored business activism from 1930 to 1980 when civil rights dominated school reform and the decentralization of the 1980s she also covers the uneasy cooperation among business associations in the 1990s to install the mayor as head of the school system a governing regime now challenged by privatization advocates business people may be too wedded to a stunted view of educators to forge a productive partnership for change unionized teachers bridle at the second class status accorded them by managers if reform is to reach deeply into classrooms shipps concludes it might well require a new coalition of teachers unions and parents to create a fresh agenda that supersedes corporate interests this study clearly shows that in chicago as elsewhere urban schooling is intertwined with politics and power by reviewing more than a century of corporate efforts to make education work shipps makes a strong case that it s high time to look elsewhere perhaps to educators themselves for new leadership

branded a cultural chernobyl and the tragic kingdom the euro disney resort has been on its own thrill ride since opening in 1992 the much publicized version of the magic kingdom gave europeans alcohol free mocktails surly employees even colors too muted for the disney image facing financial disaster was it any wonder that disney execs found themselves wishing upon a star for answers after so many knee jerk criticisms of euro disney this book combines firsthand experience and research to shed new light on claims that the park is nothing more than a form of american cultural imperialism andrew lainsbury a former euro disney employee who knows what the park meant to its visitors goes beyond media bites and academic scorn to examine europe s love hate relationship with euro disneyland and some of the undiscussed issues surrounding it once upon an american dream is a story of global capitalism on a grand scale lainsbury has plumbed company archives and interviewed key players to give readers the real view from le chateau de la belle au bois dormant sleeping beauty s castle he cracks open the euro disney controversy to reveal the park not as a tragic experiment in exporting american culture but the result of european efforts to import a popular form of american entertainment

Iainsbury tells how the walt disney company came to build a european park and locate it in france how political negotiations affected its design and development how it was promoted to continental audiences and what caused its widely publicized financial woes before being rescued by a real prince from saudi arabia he reveals what it took to win back the hearts of skeptical europeans such as serving wine selling flashy merchandise and placating disgruntled workers finally he looks into the magic mirror to speculate on the role of euro disney and the walt disney company in the twenty first century ultimately Iainsbury shows that cultural imperialism is not an exclusively american phenomenon but a global corporate strategy and that global corporatism by needing to be responsive to consumers is so complex that it may not be as monolithic as feared once upon an american dream is a fairy tale for our times reminding us that for all the critical huffing and puffing the creation and marketing of pleasure is what euro disneyland is all about

money greases the wheels of american politics from the local level to the white house in the 2004 presidential campaign president george w bush alone raised nearly 400 million in private and public funds nearly twenty times the combined total raised by john kennedy and richard nixon in 1960 to defeat challenger john f kerry further fueling anxiety over the power of money to dictate political results melvin urofsky one of our nation s most respected legal historians takes a fresh look at efforts to rein in campaign spending and counter efforts in the courts to preserve the status quo he offers a thoughtful and balanced overview of campaign finance reform and the legal responses to it from the progressive era through the supreme court s landmark ruling in mcconnell v fec 2003 and its impact on the 2004 election urofsky focuses especially on the 1971 federal election campaign act and 2002 mccain feingold or bipartisan campaign reform act bcra and on challenges to both in the supreme court in buckley v valeo 1976 the court upheld contribution limits but struck down expenditure caps on first amendment grounds in mcconnell it upheld the key provisions of mccain feingold in both cases however opponents argued that congressional control of campaign financing was an unconstitutional infringement of the free speech rights of campaign contributors urofsky deftly steers the reader through this contentious and complex history revealing how both congress and the courts have navigated uneasily between the scylla of potential corruption and the charybdis of suppressing political speech ironically despite the court s decision upholding mccain feingold the 2004 presidential election was the most expensive in history because as urofsky notes money is the mother s milk of politics and both candidates and donors will always find ways to keep it flowing his book provides an excellent and succinct guide to the controversies and historical debates emerging from that fact
